

# Workshop Services

A new state of the art workshop for service and repair has been established at Imenco

The workshop is offering a variety of services for the offshore and maritime industry. The workshop is fully equipped for any mechanical and hydraulic works, such as maintenance and repair of diving systems, O<sub>2</sub> cleaning, pressure testing, and other repair work for the offshore and maritime industry. Skilled workers within mechanical and hydraulic background are ready to provide requested service and repair.
