

Press Release – 12th May 2020

Imenco UK Ltd., COVID-19 Response

Imenco UK Ltd have responded to the call to industry to provide essential breathing equipment, helping support front-line medical staff in the fight against COVID-19. The company has been approved to manufacture under licence, the Tested and Approved for use in the treatment of COVID-19, [Mercedes AMG F1/UCL Ventura CPAP Breathing Apparatus](#).

Our Diving and Manufacturing teams have been working hard, reviewing all the Engineering Drawings and Manufacturing Requirements and we are pleased to say, now ready to go into production.

Mercedes AMG F1/UCL Ventura CPAP Breathing Apparatus

The Ventura CPAP Breathing Apparatus can help keep COVID-19 patients out of intensive care. It was adapted by mechanical engineers at UCL and clinicians at UCLH working with Mercedes-AMG High Performance Powertrains (Mercedes-AMG HPP). It does not require an electrical supply, has been approved for use in the NHS, and can be made available to help the Worldwide Healthcare system reducing pressure on front-line medical staff.
